

## ENERGIZE SAVINGS

BY LAURA LONG

Did you know every 24 hours, enough sunlight touches the Earth to provide energy for the entire planet for 24 years?

Have you ever heard the quote “It’s not about how much money you make, but how much money you keep?” At Diazo, we have had many conversations with clients regarding just how much of their money is going towards rising energy costs – money that could be put to better work in their plans with the right solutions.

Home Services is one of the sectors of Diazo's Concierge Services. This month, we highlight Robco Electric, one of our Electrical and Solar providers.

## **ROBCO ELECTRIC: EXEMPLIFYING HONESTY, INTEGRITY, AND LONGEVITY IN THE ELECTRICAL INDUSTRY**

In an age where business values often seem to waver, one Las Vegas-based company stands firm on its principles of honesty, integrity, and longevity. Robco Electric, a family-run electrical contracting company established by Las Vegas electrician Rob Kowalczyk in 1997, continues to exemplify these core values in its operations, leaving an indelible mark on the local business landscape.

## **COMMITTED TO FAIRNESS AND TRANSPARENCY**

Robco Electric prides itself on its old-fashioned approach to business. They firmly believe in fair project bidding, transparent communication regarding timelines and budgets, and delivering prompt, accurate results. Their commitment extends not only to their clients but also to their employees, whom they treat with respect, courtesy, and gratitude.

## **ADVOCATES FOR A BETTER NEVADA**

Robco Electric's dedication to Nevada transcends the business realm. The company actively supports policies aimed at making the state more livable and economically robust for all its residents. One notable example is their involvement in advocating for Nevada Assembly Bill 405 (AB 405), known as the Renewable Energy Bill of Rights. Rob Kowalczyk and his team threw their time and resources into education efforts spearheaded by organizations such as Bring Back Solar and The Alliance for Solar Choice, recognizing the vital importance of this issue for Nevada's future.

## **A TRUSTED NAME IN ELECTRICAL CONTRACTING**

At the heart of Robco Electric's operations lies its Las Vegas Commercial Electrical Division. Over the years, the company has built a legacy of delivering high-quality work and exceptional project management, earning a reputation as one of the most trusted electrical contractors in the city. They offer comprehensive services, including design, project management, and execution for projects of all sizes. From tenant improvements to ground-up construction and overhauls of aging electrical systems, Robco Electric's diverse portfolio speaks volumes. Satisfied clients include prestigious names like McCarran International Airport, PT's Pubs, Starbucks, various City Parks and Recreation Departments, major medical facilities, the state Department of Corrections, and the Clark County School District.

## **LEADING THE CHARGE IN SOLAR ENERGY**

Robco Electric's Solar Division has been instrumental in helping thousands of Las Vegas Valley residents harness the power of clean solar energy. Their impressive track record has earned them a place on the Solar

Power World Top 500 contractor list for six consecutive years, solidifying their position as one of the premier solar companies in Las Vegas. Notably, their expertise extends beyond installation; they are licensed electricians, not just solar contractors. This versatility allows them to repair and expand solar PV panels and systems installed by other companies, providing much-needed support to those whose original installers are no longer in business.

## A HOLISTIC APPROACH TO TECHNOLOGY

Robco Electric's Low Voltage Division offers a comprehensive range of services, including fire alarm systems, camera systems, Closed Circuit TV systems, access control, intrusion alarms, intercom/clock systems, voice/data systems, and interactive projector installations. Their commitment to staying at the forefront of technological advancements ensures their clients have access to state-of-the-art solutions for their needs.

## CREATING JOBS AND MAKING A DIFFERENCE

Since the signing of Nevada Assembly Bill 405 (AB 405) in June 2017, Robco Electric has been at the forefront of creating jobs in their Solar Division, effectively contributing to the state's economic growth. Notably, this effort has allowed them to rehire some of their former employees, further solidifying their commitment to the community and their workforce.

In an era when values often take a back seat, Robco Electric remains a shining example of a company that thrives on the pillars of honesty, integrity, and longevity. Their dedication to their clients, employees, and the state of Nevada is a testament to the positive impact that businesses can have when they stay true to their principles. Robco Electric is not just an electrical contractor; it's a beacon of integrity in the Las Vegas business landscape.

# ROB KOWALCZIK: A VISIONARY LEADER

Rob Kowalczyk's journey as a Las Vegas electrician who founded Robco Electric in 1997 has been marked by steady growth and unwavering commitment to excellence. His dedication to upholding the highest standards of professionalism is evident in the company's impeccable record – not a single complaint has ever been filed with the Nevada State Contractors Board against Robco Electric. Their sterling reputation is further bolstered by positive reviews and a loyal customer base.

Rob Kowalczyk's efforts extend beyond the confines of his business. He has actively engaged with media, testified at public utility commission hearings, and appeared at the State Capitol to enlighten lawmakers and the public about the impact of certain decisions on the local economy. One such decision was the PUC (Public Utilities Commission) ruling, which he highlighted as having caused harm to the local economy.
