### LESS TAXING TAXES

BY LAURA LONG

As Ann Landers once wisely said, “A person doesn’t know how much he has to be thankful for until he has to pay taxes on it.”

A common misconception is that working with a CPA is only for corporations or individuals with extreme wealth. The fact is CPAs are equipped to help a wide range of people, with a wide range of financial situations and incomes – and provide great value to those who seek their services.

This month, Diazo highlights Timothy C. Downer, one of our Certified Public Accountants.

# ABOUT CPA FINANCIAL ARCHITECTS

CPA Financial Architects was established in 2006 and considers the well-being of their clients to be of utmost importance. They believe that strategy is borne of insight, perspective and confidence. The Firm's success is a direct result of their attention to detail. Comprehensive data gathering, coupled with multi-dimensional tax and business analysis results in unique solutions, allowing them to serve their clients at the highest level.

We take a careful, calculated, and systematic approach to your business and tax planning. Your peace of mind is achieved by techniques that utilize a judicious mix of tax assets producing both adequate tax savings and sufficient capital to safely meet your goals. In the course of a lifetime, anyone who earns, spends, saves, invests, owns, manages, marries, shares ownership, buys, sells, gives,

protects what is theirs, inherits, or retires will benefit from expertise of the CPA Financial Architects

We have learned over the years that not many accounting firms serve the new business start-up sector. Sure, there are plenty of firms that will help a client set up a new LLC or Corporation but often that is where the relationship ends. This is where we excel; because we listen thoroughly to our clients and their needs and desires, we guide them in making the best decision to meet their goals which often includes involving professionals from other industries.

We encourage our new clients to text or email us with quick questions and we don't "punch the clock" every time we get a text, call, or email. We believe this is how trust and a long-term relationship is built.

## ABOUT TIM

Tim Downer holds the **Certified Public Accountant (CPA)** certification licensed in the State of Nevada and is an IRS Enrolled Agent (EA). He has expertise as a small business advisor and individual and business tax consultant with a focus on new venture creation and business planning. Tim has a BSBA in Accounting from the University of Nevada, Las Vegas where he graduated Magna Cum Laude. He spent a few years serving as the registered financial, operations, options and compliance principal of a boutique broker-dealer. As the sole owner of CPA Financial Architects, he guides small businesses and individuals minimize federal and state tax burdens integrating and planning projected financial goals.

Tim holds multiple professional licenses and designations and passed all four parts of the Uniform CPA exam in the State of Nevada on his first sitting. As a founder of Financial Architects, Tim is a proponent of using his comprehensive understanding of business to provide clients with long-term tax saving strategies.
